🧪 Activity 1 · Internet in our daily life

Activity 1 Column A gives some areas of daily life where the internet is used a lot. Write one related activity in Column B. One is done for you.

Area (A)	Activity (B)
1. Entertainment	1. Listening to songs
2. Education	2. ?
3. Business	3. ?
4. Banking	4. ?

💡 SAMPLE ANSWER

Area (A)	Activity (B)
1. Entertainment	1. Listening to songs
2. Education	2. Online classes / reading e-books (e.g. e-Pathshala)
3. Business	3. Buying and selling goods online
4. Banking	4. Sending money online / checking account balance

⭐ Browser and its basic functions · Activities

Activity 1 Match the browser names in Column A with their correct icons in Column B: Internet Explorer, Mozilla Firefox, Google Chrome.

💡 SAMPLE ANSWER

- **Internet Explorer** → blue letter "e" with a yellow ring around it
- **Mozilla Firefox** → orange fox wrapped around a blue globe
- **Google Chrome** → round icon in red, yellow and green with a blue circle in the middle

(check the picture in your book)

Activity 2 **Names of some famous browsers are hidden in the grid. Find them.**

A E X P L O R E R C
B F M O Z I L L A H
C G J P L O R V Z R
D H K E M P S W A O
E I K R N Q T X B M
S A F A R I U Y C E

✔ ANSWER

- **EXPLORER** – row 1, left to right
- **MOZILLA** – row 2, left to right
- **CHROME** – last column, top to bottom
- **OPERA** – 4th column, top to bottom (rows 2–6)
- **SAFARI** – last row, left to right

⭐ Website, URL · Activities

Activity 3 **Try to open the website of the Olympic Games and write the steps.**

💡 SAMPLE ANSWER

Step 1: Open a browser (e.g. Google Chrome or Mozilla Firefox) by clicking its icon on the Desktop or Taskbar.

Step 2: Type "Olympic Games" in the search box (or type the URL www.olympics.com in the address bar).

Step 3: Press Enter and click the title of the official Olympics website. Its home page opens.

Activity 4 **Open these famous websites and write their URL. One is done for you.**

Website	URL
e-pathshala	http://epathshala.nic.in/
Google	?
Facebook	?
Gmail	?
Yahoo	?

✔ ANSWER

Website	URL
e-pathshala	http://epathshala.nic.in/
Google	https://www.google.com/

Facebook	https://www.facebook.com/
Gmail	https://mail.google.com/
Yahoo	https://www.yahoo.com/

📝 Exercises · 1. MCQs

1 (a) **U.R.L. stands for –**

i. Uniform Research Locator

ii. Uniform Resource Locator

iii. Universal Resource Locator

iv. All three

✔ ANSWER

ii. Uniform Resource Locator

It is the unique address of every resource on the internet.

1 (b) **An example of a search engine is –**

i. Google

ii. Yahoo

iii. Windows

iv. Both a and b

✔ ANSWER

iv. Both a and b

Google and Yahoo are search engines; Windows is an operating system.

1 (c) **Some uses of a browser in our daily life are –**

i. Finding information
ii. Finding pictures
iii. Getting deep sleep
iv. Both a and b

✔ ANSWER

iv. Both a and b

A browser helps us find information and pictures.

1 (d) **The first page of any website is called –**

i. Main page
ii. Home page
iii. House page
iv. Ghar page

✔ ANSWER

ii. Home page

1 (e) **Names of some famous browser programs are –**

i. Google Chrome
ii. Windows
iii. Internet Explorer
iv. Both a and c

✔ ANSWER

iv. Both a and c

Google Chrome and Internet Explorer are browsers; Windows is not.

5 **What is the purpose of Pen blocks in Scratch?**

a. To add sound effects to a project

b. To control the movement of sprites on the stage

c. To draw lines and shapes on the stage as sprites move

d. To change the background colour of the stage

✔ ANSWER

c. To draw lines and shapes on the stage as sprites move

With "pen down", the sprite leaves a line wherever it moves.

6 **What is the definition of a programming language?**

a. A set of instructions to solve a problem

b. A particular software application

c. A language used by humans, in which written instructions can be carried out (executed) by a computer

d. A debugging tool

✔ ANSWER

c. A language used by humans to write instructions that a computer can execute.

7 What is the definition of control of flow in computer programming?

a. The order in which instructions in a program are executed

b. The process of debugging errors in a program

c. The process of designing an interface for user input

d. The process of representing code in a flowchart

✔ ANSWER

a. The order in which instructions in a program are executed

📝 Exercises · 2. Fill in the blanks

2 (a) WWW stands for _____.

✔ ANSWER

World Wide Web

2 (b) We can type the address of any website in the _____ bar of the browser.

✔ ANSWER

Address

2 (c) A _____ is mainly divided into two parts – Title and Body.

✔ ANSWER

web page

2 (d) _____ and _____ are famous search engine programs.

✔ ANSWER

Google and **Yahoo**

2 (e) _____ means the rules for communicating with people or groups on the internet.

✔ ANSWER

Netiquette

Exercises · 3. True/False

3 (a) The last page of any website is called the home page.

✔ ANSWER

False. The **first** page of a website is called the home page.

3 (b) **With the help of a browser we can find any kind of information.**

✔ ANSWER

True

3 (c) **We cannot find pictures on the internet.**

✔ ANSWER

False. We can find pictures using a search engine's Images tab.

3 (d) **Mozilla Firefox is a browser program.**

✔ ANSWER

True

3 (e) **Any person who uses digital technology with the internet is a digital citizen or NETIZEN.**

✔ ANSWER

True

📝 Exercises · 4. Match the following

4 **Match Column A with the pictures in Column B.**

Column A: Chatting, Searching, Shopping, Ticket booking

💡 SAMPLE ANSWER

- **Chatting** → a chat / messaging app (e.g. WhatsApp)
- **Searching** → a search engine (e.g. Google)
- **Shopping** → an online shopping website (e.g. shopping cart / Amazon)
- **Ticket booking** → a travel ticket website (e.g. train ticket / IRCTC)

(check the picture in your book)

❓ Short answer questions

1 **What is the difference between an algorithm and a flowchart?**

✔ ANSWER

- An **algorithm** is the step-by-step solution of a problem written in simple words.
- A **flowchart** shows the same steps as a picture, using shapes (oval, box, diamond) joined by arrows.
- A flowchart is easier to follow at a glance; an algorithm is easier to write.

2 **Define programming language.**

✔ ANSWER

A programming language is a language used by humans to write instructions (a program) that a computer can understand and execute. Examples: Scratch, Python.

3 **What is the concept of control flow in computer programming?**

✔ ANSWER

Control flow is the order in which the instructions of a program are executed.

- Normally instructions run one after another (sequence).
- Decisions (if–else) choose which instructions run.
- Loops (repeat) run some instructions again and again.

❓ Long answer question

1 **Draw the figure shown below using Scratch.**

💡 SAMPLE ANSWER

Example: drawing a square (change the numbers for the figure in your book):

- **when green flag clicked**
- **erase all**, then **pen down**

- **repeat 4**: **move 100 steps**, **turn ↻ 90 degrees**
- **pen up**

For a triangle use repeat 3 and turn 120°; for a hexagon repeat 6 and turn 60°.
