⭐ Introduction to Motor Fitness

1 Why is warm-up important?

✔ ANSWER

Warm-up prepares the body for an activity.

- It raises the body temperature and heart rate, so we play better.
- Warming up, stretching muscles and moving joints before an activity **lowers the risk of injury**.

2 How to warm-up?

✔ ANSWER

- For about **5–10 minutes**, do light exercises that slowly become harder, related to your sport (e.g. football kick, passing a rugby ball, lifting light weights, shadow boxing).
- Then do general exercises such as jogging, shuttle runs and high knee sprints.
- When you feel energised, do stretching exercises before starting the sport.

3 Why should we stretch?

✔ ANSWER

Stretching helps the joints move through their **full range of motion** and prepares the body for activity.

- Stretching before (pre-stretching) **reduces the risk of injury**.
- Stretching after (post-stretching) **helps in recovery**.

4 How to stretch?

✔ ANSWER

- Keep your body relaxed.
- Take slow and deep breaths.
- Stretch only within your own limits; do not try to compete with others, because everyone's flexibility is different.

5 Why cool-down? How to cool-down?

✔ ANSWER

Why: Cooling down brings the body back to rest slowly by lowering the body temperature and heart rate in a controlled way. It also gives time to think about our performance, calm down and relax.

How: After the activity, gently stretch the body for **5–10 minutes**, relaxing the muscles from head to toe, and do deep breathing exercises.

⭐ MF-1 Obstacle Race · Circle Time – Identify a physical injury

1 **Identify the distress signals and report physical injury to your teacher.**

✔ ANSWER

Signs of a physical injury:

- Discomfort or difficulty in moving
- Bruises and rashes
- Blood (a cut or wound)
- Intense pain
- Painful facial expressions

If you or a friend shows any of these, **stop playing and tell the teacher at once**.

2 **Share a moment when you kept trying to complete a task in a game despite the fact that the game was difficult.**

💡 SAMPLE ANSWER

In the obstacle race, I found hopping inside the hula hoops difficult and my foot touched a hoop. I did not give up, slowed down a little and finished my turn so my team could continue. It taught me to keep trying.

⭐ MF-2 Balancing Act · Circle Time – Balancing

1 **Identify the movements of the body parts which helped you in balancing the object on**

your head.

💡 SAMPLE ANSWER

- **Head and neck** kept straight and steady.
- **Back** kept straight (good posture).
- **Eyes** looking straight ahead at the finish line.
- **Arms** held slightly out to the sides to keep balance.
- **Legs and feet** taking small, slow and even steps.

⭐ MF-3 Shivam Says · Circle Time – Feel the muscle stretch

1. **Hold the position and feel the muscle stretch involved while performing that specific activity.**

💡 SAMPLE ANSWER

Examples:

- "Touch your toes" → stretch in the back of the thighs (hamstrings) and calves.
- Overhead arm stretch → stretch in the arms, shoulders and sides of the body.
- Quadriceps stretch → stretch in the front of the thigh.

⭐ MF-4 Collaborate and Conquer · Circle Time – Helping others

1. **Compare the time taken by the captain and the team. What do we learn from that**

observation?

💡 SAMPLE ANSWER

The team usually takes **less time** than the captain alone, because many hands share the work.

We learn that **teamwork and helping each other** make a job faster and easier.

2 **How can you use the learning of today's activity in helping your teacher?**

💡 SAMPLE ANSWER

We can work together to help the teacher, for example arranging desks, distributing and collecting notebooks, or setting up and putting away sports equipment quickly as a team.

⭐ MF-5 Grab the Ball · Circle Time – Appreciating others

1 **Share one good quality of the opposing team player.**

💡 SAMPLE ANSWER

The opposing player was very quick and alert; he picked up the ball fast and played fairly without pushing anyone.

2 **Discuss how it felt while appreciating the opposing team player.**

> 💡 **SAMPLE ANSWER**
> It felt good. Praising the other player made both of us happy, showed good sportsmanship and made us friends.

⭐ MF-6 Push-up Position and Pass the Ball · Circle Time – Mental Toughness

1 **Express how you felt when you were on the verge of quitting the game.**

> 💡 **SAMPLE ANSWER**
> My arms and shoulders were shaking and tired, and I felt like dropping down.

2 **What motivated you to maintain the position?**

> 💡 **SAMPLE ANSWER**
> My partner and teammates cheering me, the wish to win for my team, and telling myself "just a few more seconds" helped me hold the position.

⭐ MF-7 Tic-Tac-Toe Dribble Relay · Circle Time – Team spirit

1 **Share your experience of collective thinking that helped your team in blocking the**

opponent's move and progressing your team's move.

💡 SAMPLE ANSWER

In the one minute of discussion, we planned to first take the centre ring. When the other team had two marks in a row, we quickly told our next player to block it. Thinking together helped us block them and make our own line.

2 **What do you think can build team spirit among the players in such activities?**

💡 SAMPLE ANSWER

- Planning and discussing together
- Listening to every member's ideas
- Encouraging and cheering each other
- Sharing the win or loss as one team

⭐ MF-8 Crocodile Race · Circle Time – Coordination

1 **Identify the mistakes you did during the game and discuss how to improve them.**

💡 SAMPLE ANSWER

Mistakes: we moved too fast, our steps were not together, and my hands slipped. To improve: start slowly, move with a fixed rhythm (count "1-2"), keep the body straight and hold the ankles firmly.

2 **Discuss how you maintained coordination and balance with yourself and with your game partner.**

💡 **SAMPLE ANSWER**

I kept my body straight and strong in the plank position. My partner and I talked to each other, moved at the same speed, and my partner held my ankles carefully.

⭐ MF-9 Head, Shoulder, Knee and Ball · Circle Time – Attentiveness

1 **Share your experience on how you remained focused to give the right response to each call.**

💡 **SAMPLE ANSWER**

I listened carefully only to the teacher's voice, kept my eyes on the ball, ignored other noises and did not move until I heard the word clearly.
